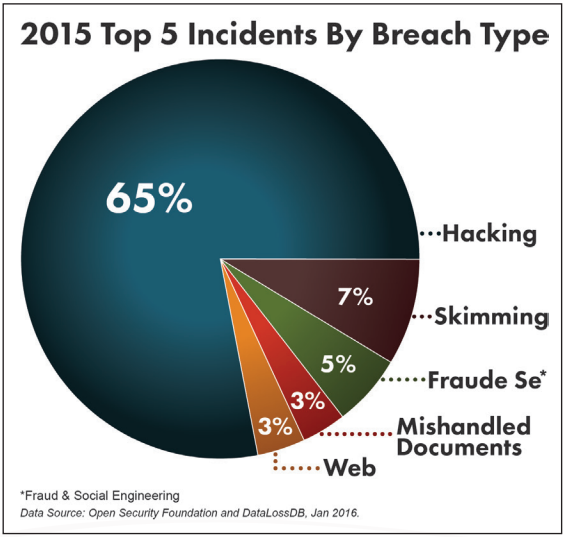
Cyber Security Insurance

Cyber Security Insurance (CSI) is insurance protection for the broad range of network-related exposures unique to physicians, hospitals and other health care professionals. Electronic medical records and HIPAA have made these activities a fundamental aspect of medical practice. Losses are increasing as a result of public awareness of identity theft, hacking, ransomware attacks, and the initiation of class action lawsuits.

With CSI coverage, not only do you receive a layer of insurance specific to the risks associated with the security and privacy of health-related data, you gain peace of mind knowing expert claims management is on your side. KaMMCO provides a basic level of coverage with most policies. Higher limits are available upon request.



As an added benefit, KaMMCO offers members access to an online resource which provides up-to-date compliance information, educational tools, sample policies, and more to help you manage your cyber exposure.

Contact a KaMMCO representative at 1.800.232.2259 to request higher limits or learn more about Cyber Security Insurance!
